DETAILED ACTION

This application was filed 6/29/2005 and is a 371 of PCT/GB03/05286 (12/4/2003) which claims priority to UK 0228430.5 (12/5/2002) and UK 0229109.4 (12/13/2002). Claims 1-8 are before the Examiner.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, claims 1-8 are drawn to the use of O,O-di-p-aryoltartaric acid as a resolving agent for mefloquine. However, the use of "aryoltartaric acid" has not been found in the instant specification. Further, "aryoltartaric acid" has not been defined in the specification. Is this a specific compound? Or is this a generic name for aryl-tartaric acid? Clarification is required.

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the use of O,O-di-p-tolyoyl-L-tartaric acid in the resolution of mefloquine, does not reasonably provide enablement for the use of O,O-di-p-aroyletartaric acid as resolution agent. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. Description is found for O,O-di-p-tolyoyl-L-tartaric acid in the examples. However, O,O-di-p-aroyletartaric acid is not found in the specification.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Carroll.

Carroll teaches the use of O,O-di-p-toluoyltartaric acid (page 210 2nd paragraph from the bottom) in the optical resolution of compound 4 which is mefloquine. This anticipates the instant claims.
